

VA-DIRECT

The VA-DIRECT is a 25-volt system loudspeaker designed to generate the optimum masking sound for a variety of ceiling conditions. It is equipped with a 13cm (5 in.) driver installed in a sealed enclosure.

The design is ideal in open structure ceiling configurations since the speaker, terminal and switch will be hidden when the speaker is hung from the deck.

It is typically installed by VoiceArrest™ as a direct-field speaker. In the case of an open ceiling, it can be attached to the structure. The VA-DIRECT loudspeaker can be oriented in any direction. Four different power taps (½, 1, 2 and 4W) controlled with a rotary switch allow quick adjustments to the output level. A RoHS compliant version is also available.

TECHNICAL SPECIFICATIONS

Power	10W
Line Voltage	25V
Sensitivity	91 dB
Material	ABS Fireproof
Frequency Response*	100 Hz -10 kHz
Connectors	4 mm (5/32") Screw terminals
Driver	13 cm (5 in.) full range
Color	Black or white
Weight	1.6 kg (3.5 lbs)
Shipping Weight	1.8 kg (4 lbs)
